

Medi-Ray offers "just in time" delivery schedules for its clients to reduce customer inventory costs and achieve mutually economical delivery quantities. Maintaining 'safe' inventory levels for raw material, components and finished products is an important factor in this process. Medi-Ray maintains a safety stock of castings, components, and finished products so as to guarantee timely delivery.

Mutually developed quality assurance procedures are performed by Medi-Ray personnel thereby guaranteeing quality levels and reducing customer inspection costs. Medi-Ray quality control procedures are refined and expanded to include inspection procedures stipulated by customers, so as to reduce customer quality control inspection and related costs. Certification by Medi-Ray quality control personnel accompanies each shipment.

Medi-Ray quality control testing and inspection includes, but is not limited to, unit weight criteria, destructive testing, dimensional reviews, visual reviews including reference to PMS color charts, 'fit' testing and functionality testing. Proprietary testing techniques, developed by Medi-Ray, guarantee the presence of solidity and elimination of voids or porosity.

Recycling programs, developed to customer requirements are provided by Medi-Ray to safeguard proper re-use of lead products. Medi-Ray provides for its customers the ability to recycle the lead products Medi-Ray produces for them. Thirty years ago Medi-Ray developed this environmentally sound capability, this has made Medi-Ray a leader in ecologically compliant operations which safeguard the public, guarantee the proper handling of used lead products and reduces costs to our customers.

Extrusions

Coated Shipping Containers

Lead Bricks

Metal Components

Custom Containers

Medi-Ray Processes

- Castings
- Stampings
- Insert Casting
- Coatings
- Labeling
- Extrusions
- Machining
- Assembly
- Painting

Medi-Ray Products

- Medical Instrumentation
- Shipping Containers
- Laboratory Accessories
- Counterweights
- Syringe Shields
- Un-Coated Containers
- Metal Components
- Source Shielding
- Lead Bricks
- X-Ray Shielding
- Sheet Lead

Medi-Ray Services

- Design Engineering
- CAD Services
- Prototyping
- Mold Making
- Secondary Operations
- Component Sourcing
- Quality Control
- Just-In-Time Delivery
- Safety Stocks
- Recycling
- One Stop Shopping
- Strategic Partnerships
- Low Porosity
- All Custom products
- Environmentally Friendly Operations
